In the Claims:

1. (currently amended) A method for the antimicrobial treatment of substrates by applying onto or incorporating into said substrate a composition comprising The use of a compound of formula (I)

$$R_2$$
 (I)

wherein

 R_1 is substituted or unsubstituted C_6 - C_{30} alkyl or substituted or unsubstituted C_3 - C_7 cycloalkyl, and R_2 is H, COOH or substituted or unsubstituted O- C_1 - C_{30} alkyl. [[,]] in the antimicrobial treatment of surfaces.

- 2. (currently amended) A method Use-according to claim 1, wherein R₁ is substituted or unsubstituted C₀-C₂₀alkyl.
- 3. (currently amended) A method Use-according to either claim 1-or claim 2, wherein a composition comprising a compound of formula (I) is used in the antimicrobial treatment, deodorisation or disinfection of applied to the skin, oral or other mucosa, the surfaces of the teeth, or hair.
- 4. (currently amended) A method Use according to any one of claim [[s]] 1 to 3, wherein a composition comprising a compound of formula (I) is used in provides for disinfection or deodorisation of a substrate.
- 5. (currently amended) A method Use according to claim 1 any one of claims 1 to 4, wherein a composition comprising a compound of formula (I) is applied to used in the treatment of textile fibre materials.
- 6. (cancelled)
- 7. (currently amended) A method Use according to claim 1, any one of claims 1 to 6, wherein a compound of formula (I) is incorporated into used in washing and cleaning formulations.

- 8. (currently amended) A method Use according to claim 1 for any one of claims 1 to 7, wherein a compound of formula (I) is used in imparting antimicrobial properties to or preserving plastics, paper, nonwovens, wood or leather.
- 9. (currently amended) A method Use according to claim 1 for preserving commercial products, any one of claims 1 to 8, wherein a compound of formula (I) is used in imparting antimicrobial properties to or preserving commercial products.
- 10. (currently amended) A method Use according to claim 1 any one of claims 1 to 9, wherein a compound of formula (I) is used as incorporated as a biocide in an industrial process.
- 11. (original) A personal care preparation comprising
 - a) from 0.01 to 15 % by weight, based on the total weight of the preparation, of a compound of formula (I) defined according to claim 1, and
 - b) cosmetically tolerable adjuvants.
- 12. (original) An oral composition comprising
 - a) from 0.01 to 15 % by weight, based on the total weight of the composition, of a compound of formula (I) defined according to claim 1, and
 - b) orally tolerable adjuvants.
- 13. (currently amended) A method according to claim 1 for The non-therapeutic use of a compound of formula (I) in preventing the build-up of a biofilm of microorganisms and/or in removing a biofilm and/or in inhibiting or destroying microorganisms that form a biofilm.
- 14. (new) A method according to claim 1 for the antimicrobial treatment of a surface by applying onto said surface a composition comprising a compound of formula (I).
- 15. (new) A method according to claim 14 for the disinfection or deodorisation of a surface.
- 16. (new) A method according to claim 3 for the disinfection or deodorisation of skin, oral or other mucosa, surfaces of the teeth, or hair.
- 17. (new) A method according to claim 9 for preserving plastics, paper, nonwovens, wood or leather.
